

G Unova's Premier Ball

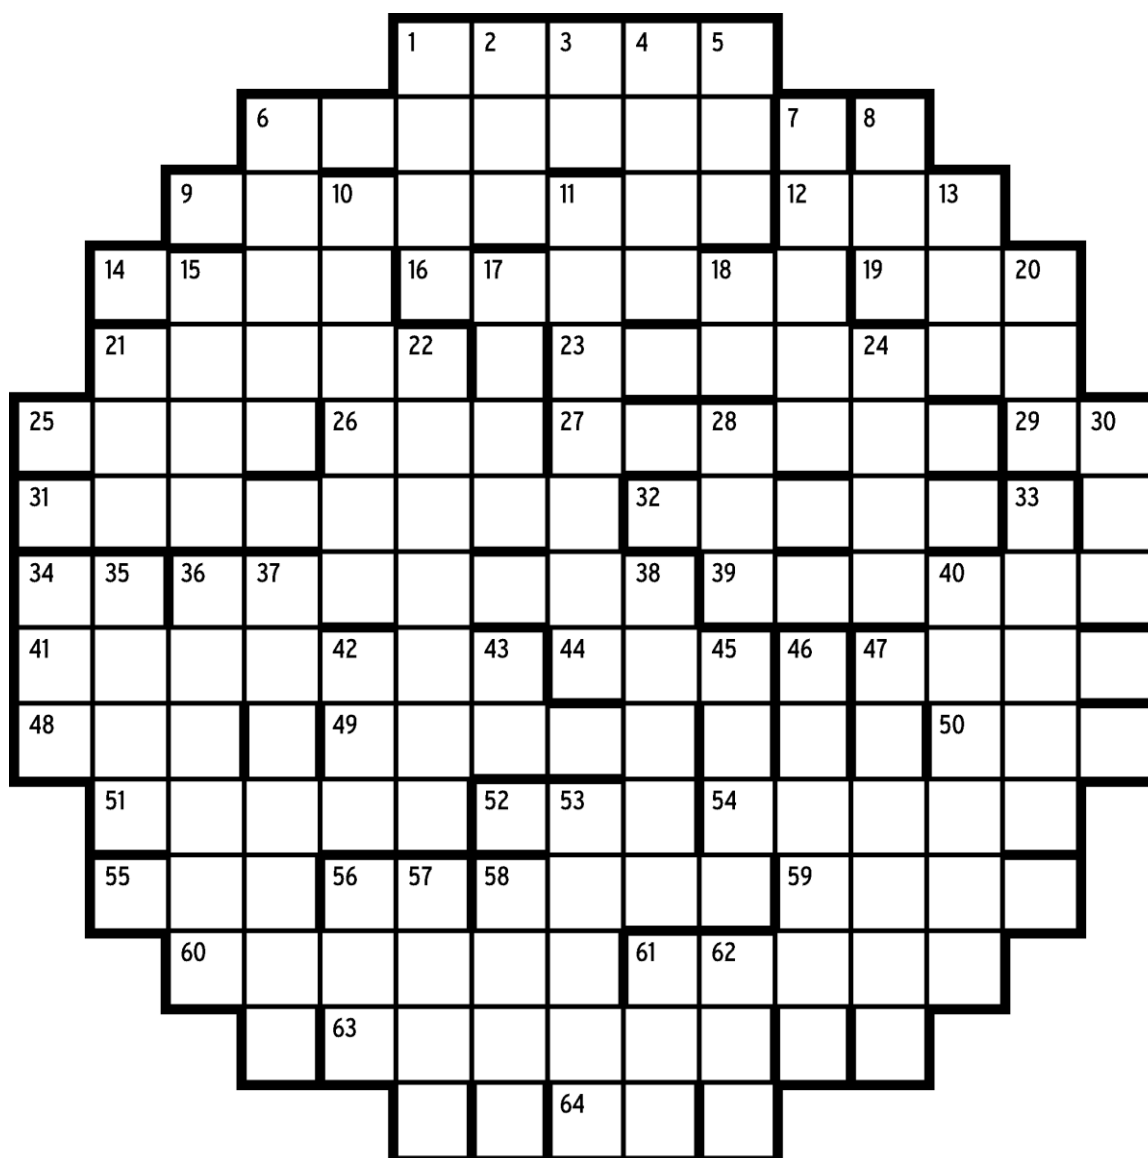

Look around! It's a strange region, but you're still seeing a lot of the same.

There are **six** specially written clues which you will need to identify. Pair the answers of these clues with six normal answers—don't worry, you will learn with experience—then order the pairs alphabetically. Solve the grid to reveal instructions. Apply them to the special answers.

Then obtain letters from each of the six normal answers:

3	4	2	3	6	5	5	1	1	4	6
---	---	---	---	---	---	---	---	---	---	---

The answer refers to the phrase obtained above, thematically (7)
